INVESTMENT STRATEGY

The investment objective of LFIS Vision UCITS - Diversified Market Neutral (the "Fund") is to seek stable returns with a low correlation to traditional markets and a target annualized volatility between 5% and 10%, under normal market conditions.

The Fund implements an investment policy seeking to capture premia linked to several risk/style factors across different asset classes including: (i) "academic" premia such as value, medium-term momentum, short-term reversal, low-risk and asset-class beta; (ii) "liquidity/carry" premia; and (iii) "implied" premia such as value and carry.

PORTFOLIO MANAGER COMMENTARY

June 2026 was once again dominated by geopolitical developments: the US and Iran signed a 14-point letter of intent during the month, opening negotiations aimed at reaching a peace agreement within a 60-day window. While this letter falls short of a formal accord, markets treated it as broadly equivalent, having already priced in a resolution of the conflict over the preceding weeks. The immediate consequence was the reopening of the Strait of Ormuz, the resumption of shipping traffic, and a sharp decline in crude oil prices to below \$70 per barrel, roughly in line with pre-conflict levels. Markets and investors have clearly looked through the near-term challenges surrounding the restart of regional production and the normalization of tanker flows through the Strait.

The first Federal Reserve meeting under Chair K. Warsh was closely watched. He made clear that combating inflation would be the primary objective of his tenure, striking a notably more hawkish tone than his widely anticipated intention to ease rates. He also announced the abandonment of forward guidance, leaving investors navigating a significantly more uncertain policy environment than under his predecessor. While the policy rate was left unchanged at this meeting, rate expectations shifted materially, with the market now pricing in one to two additional hikes before year-end. CPI and Core PCE readings unsurprisingly came in on the upside this month, though the reopening of the Strait could meaningfully weigh on future prints.

On the activity front, both the ISM Manufacturing and Services indices held in expansionary territory. Payrolls continued to show solid job creation, while the University of Michigan Consumer Sentiment Index staged a modest recovery from its all-time low. Overall, the macroeconomic data flow continues to send conflicting signals. On the equity side, global indices touched fresh all-time highs during the month, though they closed in mixed fashion and finished broadly flat on average. A notable sector rotation into semiconductors was evident, with enthusiasm in the space remaining unabated. Risk gauges stabilized over the month following the sharp tightening seen over the prior two months.

In this context, our Fund posted a positive performance.

Quantitative and systematic strategies delivered a negative month. Equity strategies are the main detractor and suffered due to Equity Value alpha. Commodities strategies delivered a negative performance due to time spreads underperformance whereas Rates and FX strategies delivered a flat performance with muted individual contributions from the sub-strategies.

Implied Volatility & Credit strategies had a negative performance. Dispersion strategies gains have been erased by MtM losses from long short positions on rates volatilities and Repo positions.

Hedging positions had a slightly negative contribution this month.
