❖ WHAT DOES THIS PRODUCT CONSIST OF?

❖ Type

It is a share class of LFIS Vision UCITS – Quant Global Allocation, a sub-fund (Fund) of LFIS Vision UCITS, an investment fund in the form of a SICAV managed by LFIS Capital and domiciled in Luxembourg.

❖ Objectives

The Fund's investment objective is to seek, in the medium term, an annualised return (after deduction of all fees and charges charged to the Fund) of at least the annualised performance of the Reference Indicator.
The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Sustainable *Finance Disclosure Regulation (SFDR*).
"Reference Indicator" means: in respect of Class IS Shares: Cash Reference Return plus 4%; and in respect of other Share Classes: the Reference Indicator for Class IS Shares less the excess management fee of the relevant Share Class compared to Class IS Shares.
"Cash Reference Return" means the maximum between the capitalised EURO Overnight Index Average ("EONIA") and zero. The Management Company does not guarantee that the Fund's investment objective will be achieved.
In order to achieve the investment objective, the Fund implements a diversified and discretionary investment policy, integrating a wide range of investment strategies, aiming for diversified and consistent returns. The investment strategies implemented by the Fund are based on two subsets of strategies based on their risk and return profiles: risk strategies and investment diversification strategies, as detailed below. These investment strategies incorporate (i) directional and/or relative value exposures related to a wide range of underlying assets, and (ii) optimized cash management. The asset classes to which the investment strategies are linked belong mainly to the European equity and debt markets and, to a lesser extent, to other international equity and debt markets as well as to foreign exchange markets. Exposure to equity and credit markets may vary over time at the discretion of the Management Company depending on its assessment of the risk/return profile of these asset classes and market conditions. The Fund may also have exposure to other asset classes eligible for UCITS.

❖ Targeted Investors

This product has been designed for investors who have an investment horizon of at least 5 years and who are willing to be exposed, in order to obtain a potential return, to a certain level of risk consistent with the synthetic risk indicator below.

❖ WHAT ARE THE RISKS AND WHAT COULD I GET OUT OF IT?

❖ Risk Indicators

1	2	3	4	5	6	7

Lowest risk — Highest risk

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. The risk indicator is based on the assumption that you keep the product for 5 years. It indicates the likelihood that the Fund will incur losses due to market developments. We have classified this Fund as a category 3 out of 7, which corresponds to a low to middle risk category. The Fund is classified in this category in that it seeks to generate returns while limiting volatility.

Further information on other risks can be found in the Fund's prospectus available at: www.lfis.com.

❖ Performance Scenarios

Investment of EUR 10,000			
Scenarios		**1 year**	**5 years** *(minimum investment period recommended)*
Tension scenario	**What you could get after deducting costs**	8 096,28	7 829,83
	Average Annual Return	-19,04%	-22%
Adverse scenario	**What you could get after deducting costs**	9 643,59	10 060,75
	Average Annual Return	-3,56%	1%
Intermediate scenario	**What you could get after deducting costs**	10 386,51	11 846,35
	Average Annual Return	3,87%	18%
Favourable scenario	**What you could get after deducting costs**	11 311,27	12 763,63
	Average Annual Return	13,11%	28%

This table shows how much you could get over 5 years, based on different scenarios, assuming you invest 10,000 EUR. The different scenarios show how your investment could behave. You can compare them with scenarios from other products.

The scenarios presented are an estimate of future performance based on historical data relating to changes in the value of this investment. They are not an accurate indicator. The positive average annual returns presented in the adverse scenario are the result of regulatory enforcement. Other adverse scenarios resulting in negative average annual returns and capital loss are possible. Past performance is not indicative of future performance.

What you get will depend on how the market moves and how long you hold the investment or product.

The stress scenario shows what you could get in extreme market situations, and does not take into account the case where we could not pay you.

The figures shown include all costs of the product itself, but not necessarily all fees owed to your advisor or distributor. These numbers do not take into account your personal tax situation, which can also affect the amounts you receive.

❖ WHAT HAPPENS IF LFIS CAPITAL IS UNABLE TO MAKE THE PAYMENTS?

For your protection, the company's assets are held by a separate company, the Custodian. Therefore, the distribution capacity of the fund will not be affected in the event of the insolvency of BNP Paribas S.A. If the fund is dissolved or liquidated, the assets will be liquidated and you will receive an adequate portion of any proceeds, but you may lose all or part of your investment.

❖ HOW MUCH WILL THIS INVESTMENT COST ME?

The decrease in return shows the impact of the total costs you pay on the return you could get on your investment. Total costs include one-time, recurring, and incidental costs.

The amounts shown here are the cumulative costs related to the product itself, for three different holding periods. They include potential early exit penalties. The figures presented assume that you are investing EUR 10,000. These figures are estimates and may change in the future.

❖ Costs over time

The person selling you this product or providing you with advice about it may ask you to pay additional costs. If so, they will inform you about these costs and show you how the overall costs will affect your investment over time.

Investment of EUR 10,000		
Scenarios	**If you go out after 1 year**	**If you are released after 5 years (minimum recommended holding period)**
Total Costs	**102 EUR**	**510 EUR**
Impact on yield (reduction in yield) per year	1,02%	1,02%

❖ Cost Composition

The table below shows:

- the annual impact of different types of costs on the return you could earn on your investment at the end of the recommended investment period;
- the meaning of the different categories of costs.

This table shows the impact on performance per year			
One-time costs	Entry fees	0%	The impact of the costs you incur when you make your investment. This is the maximum you are likely to pay: you could pay less.
	Exit Fees	0%	The impact of fees incurred when you exit your investment
Recurring Costs	Portfolio Transaction Costs	0,07%	The impact of costs incurred when we buy or sell investments underlying the product
	Other Recurring Costs	0,95%	The impact of the costs we charge each year to manage your investments
Ancillary Costs	Performance Fees	0%	The Impact of Performance Fees

❖ HOW LONG DO I HAVE TO KEEP IT AND CAN I WITHDRAW MONEY EARLY?
