INVESTMENT STRATEGY

The management objective of Velvet (the "Fund") is to achieve a performance equal to or greater than ESTR+30bps capitalised, after deduction of management fees, transaction costs and the costs of setting up the passive management techniques used. Depending on the market environment, in particular in the event of very low interest rates on the euro area money market, the return generated by the Fund may not be sufficient to cover management fees. The net asset value of the Fund could thus decrease structurally and negatively affect the return of the Fund, which could jeopardize the preservation of the invested capital.
